 Serato Scratch Live ,ive the undisputed industry standard, and the first reliable digital vinyl system dvs ever created.. According to windows, there aren't enough "resources available" for my USB device.. Earn points [? Had no idea, I thought it might've been a surface specific issue.. After a reboot, the laptop then does see the USB mini-hub, and external soundcard is functioning perfectly fine, but then Serato al1 longer sees the SL1 box – the traditional trick of scratch live sl1 and replugging the SL1's USB makes no difference, although the machine beeps in recogniton of a "functioning" peripheral, and all the drivers indicate it should be working, whilst the software still states "Rane Hardware Disconnected" Please help me with this issue – i had only upgraded the laptop to be able to cope with the power needed to run Serato 2.. No related blog entries found Thank you in advance for your time Every time I'm installing the drivers, I still get "Rane hardware disconnected" inside Serato.
